Description

White plastic thermometer with a compact and durable design, used to accurately measure ambient temperature. Made with red liquid instead of mercury, ensuring safety and ease of reading. Its construction from durable material makes it suitable for both indoor and outdoor use.

Technical Specifications

- Length: 19 cm
- Color: White
- Measurement range: -20 to 60 °C
- Content: Red liquid (mercury-free)

Provides reliable measurement in domestic, laboratory, or professional environments. It is especially useful for temperature monitoring in both open and closed spaces where a simple and safe instrument is required.

Installation is quick and does not require special tools. It can be easily placed on flat surfaces or appropriate supports, allowing clear reading of the indicator from any position.
