Description

Mini ¼ inch steel compressed air filter designed to eliminate oil, moisture and contaminating particles from compressed air in painting systems. Its construction using durable material ensures longevity in demanding industrial environments.

Technical Features

- Material: Steel
- Connection Diameter: ¼ inch

Its compact design allows for easy installation in compressed air lines, making it especially useful for maintaining finish quality in painting and automation applications. It facilitates maintenance with easy access to internal components.

It is recommended for use in industrial systems requiring clean airflow, such as spray guns, processing equipment and production lines. Its direct connection in the line enables efficient operation without interruptions caused by contaminants.

Specifications

EAN	5400338041266
Material	Steel
