Description

SDS Plus shank specifically designed for HA wall passing crown, with a length of 320 mm. Its robust construction allows efficient drilling in concrete and stone walls, making it ideal for demolition works, bracket installation, or metal structural assembly. This accessory is optimized for use with SDS Plus compatible percussion drills.

Technical specifications

- Length: 320 mm
- Connection system: SDS Plus

It offers high mechanical resistance and durability under intensive working conditions. It is suitable for industrial applications that require precision and consistent performance in heavy construction environments.

It is recommended to use it with professional percussion drills, following established safety standards. Its design facilitates handling during drilling in resistant structures such as reinforced concrete walls or natural stone blocks.
