Lithium CR2025 3V blister battery

Brand: PHILIPS

Reference: EDM 38097

Lithium CR2025 3 V battery with typical capacity of 220 mAh, designed for low-power electronic applications. Dimensions: diameter 20 mm, height 2.5 mm. Li-MnO₂ chemistry for high performance and long service life under normal usage conditions.

Description

Lithium CR2025 3 V battery in blister packaging, designed for low-power electronic applications. Its Li-MnO₂ technology offers stable performance and a long service life under normal usage conditions. This battery is compact and reliable, ideal for devices requiring a constant electrical supply without the need for recharging.

Technical specifications

- nominal voltage: 3V
- Capacity: 220 mAh
- Dimensions: diameter 20 mm, height 2.5 mm
- Chemistry: lithium manganese dioxide (Li-MnO₂)

It is commonly used in watches, meters, labels and electronic sensors where a compact and durable power source is needed. The battery offers reliable performance in low-energy demand environments.

Installation is simple: insert the battery directly into the device compartment, always checking polarity to avoid damage. Its design allows for easy replacement without additional tools.

Specifications

High	0.25
------	------

Diameter	20 mm
EAN	4895229106178
Manufacturer	PHILIPS
Weight (kg)	0.0025
