Brand: GAMO

Reference: EDM 99078

Cleaning cotton for firearms, caliber 5.5 mm, package of 100 units. They facilitate the removal of dirt and lead residues from the barrel during complete or spot cleaning in the field.

View product online

Description

Cleaning cotton designed specifically for firearm maintenance, with a caliber of 5.5 mm and a pack of 100 units. These products allow effective removal of dirt, metallic residues such as lead, and contaminating particles from the barrel during spot or complete field cleaning or in professional environments.

Technical specifications

- Caliber: 5.5 mm
- Quantity: 100 units

Their design facilitates insertion and extraction within the barrel, ensuring deep cleaning without leaving residues. The high-quality fiber offers greater resistance during the process, avoiding fraying or breaking under intensive use conditions.

It is recommended to use them with specific solvents to achieve optimal results in removing metallic deposits. Their use is simple: insert the clean cotton into the barrel and remove it after suctioning residues, followed by additional cleaning with appropriate products.
