Rutile Electrodes E6013 Ø2.5mm Pack 4 Units 272uds

Brand: COFAN

Reference: COF 09005250

Rutile electrodes E6013 Ø2.5mm for arc welding in vertical and flat positions, with AC/DC current. Ideal for general maintenance and light structure work. Complies with AWS A5.1 and EN ISO 2560-A standards.

Description

Rutile electrodes E6013 Ø2.5mm designed for arc welding in vertical and flat positions, fully compatible with both alternating and direct current. Their rutile coating provides a stable arc, easy handling, and a clean finish, ideal for general maintenance and light structure work. These electrodes meet international standards AWS A5.1 and EN ISO 2560-A.

Technical Features

- Diameter: 2.5 mm
- Material: Metal
- Current Type: DC
- Dimensions (cm): Height 8.00, Width 28.00, Depth 38.00
- Box contains: 272 units

Their versatility allows welding in all positions, making them suitable for medium-thickness metal joints and light structures. They are especially well-suited for industrial applications where a uniform finish and easy post-weld cleaning are required due to quick slag removal.

They are recommended for maintenance, repair, and general assembly of metal structures. Their design allows fast arc initiation and consistent stability during the welding process, optimizing productivity in industrial environments.

Specifications

High	8.00
Diameter	2.5 mm
EAN	8445187204858
Material	Metal
Depth	38.00
Current type	DC
