Rutile Electrodes E6013 Ø3.25mm AC/DC 163pcs

Brand: COFAN

Reference: COF 09005325

Rutile E6013 electrodes Ø3.25 mm for vertical and flat position welding with alternating or direct current, compatible with AWS A5.1 and EN ISO 2560-A standards, including 163 units per box.

Description

Rutile E6013 electrodes with a diameter of 3.25 mm, designed for vertical and flat position welding using alternating or direct current (AC/DC). These electrodes meet AWS A5.1 and EN ISO 2560-A standards, offering high strength and durability in industrial and construction applications. Their rutile composition allows clean and efficient welding, ideal for structural repairs and demanding assemblies.

Technical Features

- Diameter: 3.25 mm
- Current Type: AC/DC
- Height: 7.00 cm
- Width: 28.00 cm
- Depth: 36.00 cm

Their design facilitates handling in various working conditions, providing good arc stability and uniform deposition of molten metal. They are especially useful for industrial work where mechanical resistance and welding quality are required.

It is recommended to use them with appropriate welding equipment, maintaining controlled environmental conditions during storage. Store in a dry and ventilated place to avoid damage from humidity or extreme temperatures that could compromise performance.

Specifications

High	7.00
Diameter	3.25 mm
EAN	8445187204865
Depth	36.00
Current type	AC
