Description

The 750 ml rigidized polyurethane foam with Entry cannula is a product designed for joint sealing, thermal insulation, and structural repair in industrial environments. Its formula allows for uniform expansion and provides high mechanical resistance after curing.

Technical Features

- Volume: 750 ml
- Includes Entry cannula for direct application

Its use is mainly oriented toward construction, repair of metal and concrete structures, as well as crack sealing and void filling. It is especially effective against moisture and cold due to its insulating properties.

The foam applies easily using the integrated cannula, which allows precise flow control and minimizes waste. Its ergonomic design facilitates handling in demanding working conditions.

Specifications

EAN	8435450480942
Weight (kg)	1.5
