Description

The Nural 43 metal reconstruction paste is a professional solution for repairing and restoring damaged metallic parts. Its special composition allows achieving a resistant and quality finish, facilitating its use in industrial and mechanical environments. This bar is designed to restore shape and functionality to metallic components with high adhesion and durability.

Technical specifications

- Weight: 48 grams

Its application is simple, allowing efficient repair in workshops or work sites. It is especially useful for restoring parts with wear, cracks, or minor deformations, delivering professional results without the need for special tools.

The paste is applied directly on the damaged surface and left to dry according to manufacturer's instructions. Its ease of use and mechanical resistance make it a reliable option for preventive maintenance or structural repairs in industrial environments.

Specifications

EAN	8410020402302
Manufacturer	HENKEL
Weight (kg)	48 gramos
