Description

FITO AP8202 popcorn corn seeds are a specialized variety for producing homemade popcorn and healthy snacks. This seed stands out for its high starch content, ensuring excellent performance in the production of natural products without additives. Its resistance to adverse weather conditions makes it suitable for cultivation in temperate zones with protected environments.

Technical Features

- Grams per package: 8 g
- Variety: Popcorn AP8202

Thanks to its natural composition rich in starch and fiber, these seeds offer a high-quality product for human consumption. They are ideal for making natural snacks, suitable for both home and commercial use.

Installation is simple: it is recommended to plant the seeds in appropriate soil with regular watering and sufficient exposure to sunlight. For better results, it is suggested to grow them in greenhouses or protected areas where the environment can be controlled.
