Description

The 25 cm stainless steel flexible hose is a connection accessory designed for polyethylene pipe systems, ideal for industrial and commercial applications where a durable and reliable solution is required. Its brass construction ensures high mechanical resistance and the ability to withstand high pressures up to 10 bar, making it suitable for water and gas installations.

Technical Specifications

- Diameter: 32 mm
- Thread: Male
- Material: Brass
- Compatibility: Polyethylene pipes with diameters from 16 to 32 mm

Its design allows for a secure and precise connection in networks where efficient fluid transmission is required. It is especially useful in corrosive environments, as it offers durability and easy maintenance.

This accessory facilitates installation in water or gas distribution systems, allowing easy connection of different system components. It is recommended for industrial or commercial installations where robust and reliable connections are needed.

Specifications

Diameter	32 mm
EAN	8435210761533
Long	25
Material	Latón
