Single-use Fly Trap with Attractant

Brand: SCOA

Reference: SCO 23023

Single-use fly trap with included attractant. Requires activation with water. Designed for pest control in commercial and residential environments.

View product online

Description

Single-use fly trap with included attractant, designed to effectively capture pests in commercial and residential environments. Uses an attraction system based on chemical substances that allow selective capture without toxic pesticides. Its compact format facilitates installation in strategic areas such as kitchens, warehouses, or processing areas.

Technical Features

- Includes ready-to-use natural attractant
- Single-use design for greater hygiene
- Easy to place and replace

Its use is simple: just add water as instructed and place in the problematic area. It is recommended to position it near food or moisture sources to maximize effectiveness. It is a practical, safe, and effective solution against flying flies.

The trap adapts to industrial and commercial environments where biological pest control is required without affecting the surrounding environment. Its design allows rapid implementation in high-risk areas for fly infestation.
