Complete Pullpo Extractor 10-30

Brand: Kukko

Reference: TUR 70-01-012-C

Complete Pullpo extractor with suction capacity between 10 and 30 mbar. Designed for industrial gas and fine particle evacuation applications, it offers high energy efficiency and low noise operation.

Description

The complete Pullpo extractor with suction capacity between 10 and 30 mbar is designed for industrial gas and fine particle evacuation applications. It uses advanced ventilation technology that ensures efficient performance and quiet operation, making it ideal for environments where air control and effective vapor or particle removal are required.

Technical specifications

- Extraction capacity: 10-30 m³/h
- Material: Stainless steel
- Connection: Standard mounting for duct installation

Its modular design allows easy integration into existing systems, delivering optimal performance even in high-demand ventilation environments. It is especially useful in industrial or commercial spaces where air quality must be maintained and emissions controlled effectively.

Installation is quick thanks to its standard duct-compatible mounting system, facilitating implementation without the need for structural modifications. Regular inspections are recommended to ensure proper operation and extend equipment lifespan.

Specifications

Airflow (m ³ /h)	10-30
EAN	4021176021428
Manufacturer	Kukko
Material	Acero inoxidable
