Description

The universal extractor kit 2 and 3 arms is a modular solution for air extraction in industrial and commercial environments. Its design allows adaptation to different configurations thanks to the quick adjustment system, facilitating installation and maintenance. It includes a set of 13 pieces that ensure a secure and efficient connection.

Technical Features

- Compatibility with 2 or 3 arms
- Includes 13 pieces for quick adjustment

This kit is used in applications requiring effective and flexible ventilation, allowing simple integration into existing systems. Its modular construction facilitates system expansion or modification without the need to replace complete components.

Installation is fast thanks to the quick adjustment system that allows adapting connections without additional tools, reducing assembly time. It is recommended to follow manufacturer instructions to ensure optimal performance and extend equipment lifespan.
