Description

The 1/4" socket wrench set with swivel head is an accessory designed for fastening and mounting on various metal and non-metal surfaces. Its construction allows easy handling during installation, ensuring secure and efficient clamping. The 30 mm diameter head and M6 thread facilitate adjustment and alignment in spaces with hard-to-reach angles.

Technical Specifications

- Diameter: 1/4"
- Swivel head
- Head diameter: 30 mm
- Thread: M6

Its design allows better adaptation to irregular surfaces, making it especially useful in carpentry work, electrical installations, and industrial assembly. Ease of use and durability make this product a reliable option for applications requiring quick fastenings without the need for additional tools.

Installation is intuitive thanks to the swivel head, which allows angle adjustment during the clamping process. It is recommended for use in environments where a fast and secure solution is needed to hold metal or non-metal components.
