### Description

The stand-up rubber mallet 60 mm SIMPLEX is designed for industrial applications that require durability and resilience. Its construction from rubber material provides excellent impact absorption, making it suitable for environments where protection against impacts or vibrations is needed. The ergonomic design facilitates its use in demanding conditions.

#### Technical Specifications

- Material: Rubber
- Height: 60 mm

Its main application is in assembly, handling, and fixation tasks where a durable solution is required. It is especially useful in industrial environments that demand high stability and load-bearing capacity.

Installation is simple and straightforward, requiring no special tools or complex processes. It can be easily integrated into existing systems thanks to its standard design and compatibility with various surfaces.

### Specifications

|              |               |
|--------------|---------------|
| High         | 6.0           |
