Combined Threaded Male Fitting ULTIMATECUT M5

Brand: Ruko

Reference: TUR 270616

Combined threaded male fitting ULTIMATECUT M5 with metric thread M5, robust design for industrial applications. Compatible with standard systems, resistant to intensive use conditions.

Description

Combined threaded connection component ULTIMATECUT M5, designed for demanding industrial applications. Its construction from durable materials ensures longevity and performance in high-use environments. The metric thread M5 allows precise and secure installation in hydraulic, pneumatic or electrical systems.

Technical Specifications

- Thread Size: M5
- Connection Type: Combined Threaded

Its use is mainly oriented towards industrial installations where a firm joint without risk of leaks is required. It facilitates integration into systems that need precise and robust connections, maintaining integrity under severe operating conditions.

Installation is simple through manual rotation or with the appropriate tool. It is recommended to verify torque according to system specifications to ensure optimal performance and extend component lifespan.
