7-Piece Male Threaded Combined ULTIMATECUT Assembly

Brand: Ruko

Reference: TUR 270620RO

7-piece male threaded combined ULTIMATECUT assembly for industrial applications. Includes a variety of standard lengths and diameters, compatible with mechanical fastening systems. Designed for use in demanding environments with high torsional resistance.

Description

The 7-piece male threaded combined ULTIMATECUT assembly is designed for industrial applications that require safe, precise, and durable connections. This modular solution allows the connection of pipes or components via threading, facilitating quick installations in demanding technical environments. Manufactured with high-strength materials such as stainless steel or resistant alloys, it guarantees reliable performance under extreme conditions.

Technical Features

- Number of pieces: 7
- Connection type: Male threaded combined
- Material: Stainless steel or resistant alloy

Its modular design offers versatility in connection configurations, making it ideal for hydraulic, pneumatic, and industrial piping systems. The combination of standard lengths and diameters allows adaptation to various technical needs without compromising structural integrity.

This assembly is recommended for professionals who require reliable accessories in industrial environments where torsional resistance and precision are fundamental. Its easy installation and maintenance facilitate integration into high-demand technical projects.

Specifications

EAN	4007140397331
Manufacturer	Ruko
Material	Acero inoxidable o aleación resistente
