Description

Crown adapter designed for lighting systems with click&click connection, compatible with input diameter of 32 mm and output up to 210 mm. Facilitates fast and safe installation in industrial and commercial environments, ensuring efficient electrical power transmission. Its fixing mechanism allows easy handling during installation or replacement.

Technical specifications

- Input diameter: 32 mm
- Output diameter: 210 mm
- Connection system: Click&Click

This accessory offers a modular and robust solution for electrical distribution in projects requiring compatibility between different lighting components. Its design facilitates maintenance and allows easy integration into existing systems.

Its use is recommended in industrial or commercial installations where secure, durable, and quick connection of light components is needed. The simplicity of the mechanism enables its implementation without the need for specialized tools during installation or updates.
