HSS Quick Change Drill Ø 32-330 mm

Brand: MPS

Reference: TUR 5606-1

HSS quick change drill for drilling in metals, diameters from 32 to 330 mm. Construction in special steel with TiAlN coating for greater durability and performance in cutting operations.

Description

Quick-change HSS drill designed for intensive industrial drilling and punching applications in metals, wood, and composite materials. Its construction in HSS (High Speed Steel) ensures high wear resistance and efficiency in demanding cutting conditions. The TiAlN coating improves durability and performance during the cutting process.

Technical Features

- Diameter: 32 to 330 mm
- Material: High Speed Steel HSS
- Coating: TiAlN

Its quick-change system allows fast and efficient replacement without the need for additional tools, optimizing production time. It is ideal for use in conventional machine tools and industrial applications where precision and durability are required.

The installation is simple using a standard fixing system, facilitating its integration into existing manufacturing processes. It is recommended to maintain appropriate operating conditions to maximize product lifespan and performance during prolonged use.

Specifications

Diameter	32
EAN	4028655075606
Manufacturer	MPS
Material	Acero rápido HSS
