Quick Change HSS Bits Ø 16-330 mm Pack 2

Brand: MPS

Reference: TUR 5630-2

Quick change HSS bits with diameters from 16 to 330 mm, designed for drilling applications in various materials. They feature a quick clamping system and are compatible with lathes and standard machine tools.

Description

Quick change HSS bits with diameters from 16 to 330 mm are designed for industrial drilling applications across a wide range of materials. Manufactured in HSS (High Speed Steel) tool steel, they offer high wear resistance and durability under demanding working conditions. Their quick clamping system allows efficient exchange during operations, optimizing production time.

Technical Specifications

- Material: HSS (High Speed Steel) Tool Steel
- Diameters: 16 to 330 mm
- Quick Change System

These bits are ideal for drilling operations in industrial environments, providing a versatile and durable solution. Their design ensures optimal performance on both ferrous and non-ferrous materials.

Their installation is simple thanks to the quick clamping system, making them suitable for conventional machine tools or automated applications. It is recommended to verify equipment specifications before installation to ensure compatibility and proper performance.

Specifications

Width	16 a 330 mm
-------	-------------

Diameter	16
EAN	4028655045630
Manufacturer	MPS
Material	Acero herramienta HSS (High Speed Steel)
