Titanium Onlex 10A 250V Flush Mount Button

Brand: ALFA

Reference: ALFA 29008

Onlex 10A 250V is a high-durability electrical device for the control of power circuits in industrial and commercial installations. Its titanium housing offers superior protection against corrosion and mechanical wear, ensuring reliable operation over time in demanding environments where other materials would fail prematurely.

Description

Onlex 10A 250V is a high-durability electrical device designed for the control of power circuits in industrial and commercial installations. Its titanium housing offers superior protection against corrosion and mechanical wear, ensuring reliable operation over time.

Technical characteristics

- Nominal power: 10 Amps
- Maximum voltage: 250 Volts
- Service voltage: 230 Volts
- Housing material: Titanium
- Type: Embedded
- Assembly system: Combine with frames of the same range

This component is essential for the safe operation of energy-intensive engines, pumps and lighting systems. Its robustness allows its use in demanding environments where other materials would fail prematurely.

The installation requires a compatible frame from the same manufacturer. A correct electrical connection must be ensured while respecting the polarity and safety distances according to the regulations in force before proceeding to the final wall recess.

Specifications

Rated current (A)	10
Colour	Titanio
EAN	8425160290085
Material	Titanio
Weight (kg)	0.0867
Nominal voltage (V)	250 Voltios
Type of installation	Flush-mounted
