Description

The T/DORCAS Left Lock Safety Handlock is a high-strength device designed to protect main accesses on entry doors. Its technology of rotating casing anti-press and bolt to overlay guarantees a robust security against attempts of forced opening or mechanical manipulation.

Technical characteristics

- Measures 29x50mm
- Round internal and external safety cylinder
- Point key type cylinder with five keys included
- Four reinforced round bullions for greater mechanical strength
- Includes mounting screws
- Swivel cap anti-press

This system significantly increases the protection of critical accesses, offering a physical barrier difficult to circumvent without the corresponding keys. Its reinforced construction with additional bullions provides long-term durability in intensive use environments.

The installation requires fixing the mounting screws provided in the door frame. Ensuring that the rotating casing is properly aligned allows for smooth and safe operation of the locking mechanism, optimizing the life of the product.

Specifications

High	2.9
Width	5
EAN	8425160492465
Material	Steel
Measures	29x50 mm
Weight (kg)	1.61
