Description

The Handlock Bathroom Pomo is a security handlebar system designed to ensure privacy and access control in bathrooms, combining functionality with an elegant matt nickel finish. Its technology allows a fluid operation through an internal mechanism of automatic unemployment and a robust external condemnation.

Technical characteristics

- Finished nickel matt polished gold color
- Adjustable Lace Measurement 60/70mm
- 65mm central rosette
- Handle length available in 100 or 120mm
- Compatible door thickness between 30 and 55mm
- Metal body made of steel or zamak
- Internal system with safety vacating crutch
- External condemnation for total blockade

This device offers significant benefits by allowing the user to control who enters, ensuring a private environment without the need for keys. The metal construction guarantees durability and resistance to the passage of time in wet spaces.

The installation is simple thanks to the kit included with screwdriver and specific locksmith. It adapts to most standard doors by adjusting the central rosette and fixing the handle according to the thickness of the door.
