Description

The Niquelado Handlock Open Safety Shield is a shielding device designed to strengthen the security of the locks, protecting the cylinder against forced manipulations and mechanical attacks. Its nickel finish technology guarantees durability and aesthetics compatible with metal hardware.

Technical characteristics

- Finished in shiny nickel
- Open model compatible with standard European cylinders
- EC certification
- Corrosion resistant materials

This shield offers robust protection by strengthening the structure of the lock, being suitable for installations in wooden or metal doors that require greater perimeter security without obstructing normal access. It effectively strengthens the opening mechanisms against direct intrusions into the main cylinder.

The installation is simple and direct on the existing cylinder, ensuring a firm fit that does not compromise the functionality of the opening mechanism or the aesthetics of the door assembly. Compatible with CE-certified metal hardware, it guarantees durability and effective mechanical protection against forced handling.

Specifications

Colour	Níquel
EAN	8425160494520
Material	Metal
Weight (kg)	0.13
