Description

The T/DORCAS Left lock is a robust safety device designed to protect entry doors, incorporating cylinder technology to overlay with internal and external protection against manipulations.

Technical characteristics

- Body measurements: 29x50mm
- Integrated anti-prey rotating casing
- High security serreta key type cylinder
- Four reinforced round bolons for greater strength
- Includes three spare keys and mounting screws

This system significantly increases the protection of main accesses, offering a physical barrier difficult to overcome thanks to its reinforced construction and advanced locking mechanisms. The presence of four reinforced round blocks ensures superior stability against mechanical forcing attempts in the door frame.

The installation is simple by means of the included screws, ensuring a firm fixation in the door frame without the need for additional specialized tools. The integrated rotating anti-press housing facilitates the maintenance and daily operation of the bolt to overcome, optimizing the functionality of the safety system.

Specifications

High	2.9
Width	5
EAN	8425160494599
Material	Steel
Measures	29x50mm
Weight (kg)	1.49
