Onlex white flush switch 10A 250V

Brand: ALFA

Reference: ALFA 23850

10A and 250V white Onlex recessed switch for standard electrical installations. Compatible with frames of the same range and designed for safe operation on 230V networks. Essential component for the control of residential and industrial circuits, guaranteeing reliable technical functionality without decorative elements or additional advertising features.

Description

The 10A and 250V white Onlex recessed switch is an electrical maneuvering device designed to control circuits in residential and commercial facilities, ensuring safety and functionality through its robust technology.

Technical characteristics

- Nominal power: 10A
- Maximum voltage: 250V
- Service voltage: 230V
- Colour: White
- Type: Embedded
- Assembly system: To be combined with frames of the same range

This component provides reliable performance for standard electrical load management, ensuring continuous and stable operation in various user environments. Its compact design allows perfect integration into existing electrical panels or control panels without unnecessary decorative elements.

The installation requires prior coupling with the corresponding Onlex series frames, facilitating harmonious and safe integration within the distribution panel. This procedure ensures that the device operates correctly under the specified electrical conditions for 230V networks.

Specifications

Rated current (A)	10
Colour	White
EAN	8425160238506
Material	ABS
Weight (kg)	0.0858
Nominal voltage (V)	250V
