Description

The 10A 250V white Onex double switch is a recessing device designed to manage power circuits in residential and commercial electrical installations. Its robust construction ensures a safe and efficient control of multiple points of light or sockets, integrating aesthetically into any interior decoration.

Technical characteristics

- Nominal power: 10A
- Maximum voltage: 250V
- Service voltage: 230V
- Settings: Double polo
- Material: Retardant white plastic
- Usage: Embedded in wall boxes

This device offers a robust solution for continuous load management, ensuring stable operation under normal operating conditions. It provides a clean aesthetic that adapts perfectly to modern environments.

The installation requires opening the existing recess box and connecting phase and neutral cables according to the manufacturer's electrical scheme. It is essential to verify compatibility with frames of the same range before proceeding to final placement on the wall, using the included screws to fix the frame.

Specifications

Rated current (A)	10
Colour	White
EAN	8425160238513
Material	Plástico
Weight (kg)	0.0973
Nominal voltage (V)	250V
