Description

The S-EMPOTRAR ONLEX recessable base is an essential component for the safe installation of fixed phones, designed to integrate perfectly into electrical boards and distribution frames. Made of resistant material, it guarantees a solid and durable fixation, protecting the internal components against dust and moisture while facilitating access to wiring.

Technical characteristics

- Nominal power: 10A
- Service voltage: 230V
- Material: High quality flame retardant plastic
- Compatibility: Designed to be combined with ONLEX frames of the same range
- Connection: Standard terminalization for telephone cabling

This device offers a robust solution for residential and commercial environments, ensuring that the communication infrastructure works seamlessly. Its compact design optimizes the space inside the board, allowing a clean and efficient organization of connected equipment.

The installation is simple and quick; it is simply inserted into the corresponding frame and secured with the screws included. It does not require specialized tools or complex configurations, which makes it easier to assemble by technicians or users with basic knowledge of electricity.

Specifications

Rated current (A)	10
Colour	White
EAN	8425160238544
Material	Plástico
Weight (kg)	0.0696
Nominal voltage (V)	230V
