

## Product sheet

## Vertical white flush-mount frame for 3 ONLEX elements

Brand: ALFA

Reference: ALFA 23859

Vertical recessable frame of the Onlex series made of resistant ABS finish. The system integrates three modular elements for quick and safe installation. Its technical design allows easy assembly without complex tools, ensuring a stable and durable fixation in recessed lighting applications with standardized white finishes.

### Description

The vertical white recessing frame for 3 ONLEX elements is a standard system designed to organize and protect electrical components on distribution boards. Made with ABS finishing technology, it offers a robust and durable solution for vertical installations that require order and mechanical safety.

#### Technical characteristics

- Material: Finished in resistant ABS
- Configuration: 3 integrated modular elements
- Orientation: Specific vertical model
- Type of installation: Empotrable in board structure

This framework provides a solid structure for hosting devices, facilitating maintenance and ensuring orderly access to internal circuits. Its design optimizes the space within the board, improving the overall efficiency of the electrical installation by grouping the modules in a compact way.

The installation is simple and quick, allowing the system to be fixed on the wall or board structure with basic tools without the need for complex equipment. Once assembled, it ensures the mechanical protection of the elements housed against external impacts and dust, maintaining a uniform aesthetic finish.

For use, it is recommended to check the dimensions of the hole before mounting. The system is ideal for

applications where an orderly management of three electrical components is required at a single vertical access point within the electrical frame.

Specifications

|             |               |
|-------------|---------------|
| Colour      | White         |
| EAN         | 8425160238599 |
| Material    | ABS           |
| # Elements  | 3 elementos   |
| Weight (kg) | 0.0592        |
