Embed graphite phone ONLEX 10A 230V

Brand: ALFA

Reference: ALFA 24080

The ONLEX 10A 230V graphite phone is an electrical accessory for installation embedded in concrete or brick walls. Made of graphite, it combines with frames of the same ONLEX range to ensure aesthetic and functional integration in lighting projects or plugs, meeting technical standards required for safe use in mezzanines and offices.

Description

The ONLEX graphite phone is an electrical installation device designed to accommodate control modules or phones inside walls, ensuring safety and order in mezzanines, offices or dwellings using its robust technology.

Technical characteristics

- Nominal power: 10A
- Service voltage: 230V
- Conductive material: Graphite
- Assembly system: Embedded on walls
- Compatibility: To be combined with ONLEX frames

This component allows perfect integration into interior architectures, facilitating access to communication points without compromising the aesthetics of space. Its compact design ensures that the cables remain hidden, protecting the infrastructure from mechanical damage.

The installation requires following the current regulations to embed elements in concrete or brick walls, ensuring a solid fixation before connecting the conductors to the corresponding terminals. It is essential to verify compatibility with adjacent frames in order to achieve a uniform and professional finish in the final work.

Specifications

Rated current (A)	10
Colour	Grafito
EAN	8425160240806
Material	ABS
Weight (kg)	0.0671
Nominal voltage (V)	230V
