Onlex Horizontal 2-Element Aluminum Inset Frame Silver

Brand: ALFA

Reference: ALFA 24484

Horizontal aluminium recessed frame in silver Onlex finish, composed of two structural elements. Its elegant design facilitates integration into walls with easy and fast installation. It ensures robust fixation for lighting or signalling systems, offering professional durability and aesthetics in modern commercial and industrial environments.

Description

The two-component horizontal Onlex silver aluminium recessing frame is a high-strength system designed for the aesthetic and safe integration of electrical components into walls. Made with alloy technology, it guarantees structural durability and corrosion protection in demanding environments.

Technical characteristics

- Material: High resistance aluminium
- Finished: Silver brilliant Onlex
- Settings: Horizontal 2 elements
- Series: Embedded ONLEX
- Design: Elegant and compact

This system offers a robust fixation for lighting or signalling installations, ensuring an orderly assembly that facilitates future maintenance without compromising the integrity of the electrical system. Its horizontal design optimizes the space available on the wall, efficiently managing multiple connecting points in the same structural plane.

The installation is simple and quick, allowing to fix the frame directly on the work surface before proceeding with the final interlocking. This process ensures perfect integration into modern walls, offering professional durability and aesthetics in both commercial and industrial environments.

Specifications

Colour	Plata
EAN	8425160244842
Material	Aluminio
# Elements	2 elementos
Weight (kg)	0.1127
