Vatton 5-Piece Multi-Material Drill Bit Set 4-10mm DIN 338

Brand: ALFA

Reference: ALFA 49575

This multimaterial Vatton bits set includes five pieces from 4 to 10 mm according to DIN 338 standard for drilling wood, metal, ceramics and masonry. Made of CTY tungsten carbide, they offer maximum durability with optimized propeller for efficient extraction and reinforced body that reduces vibrations during professional use or DIY.

Description

The Vatton Multimaterial Brooch Set is an essential tool designed to perform precise drilling on various substrates such as wood, metal, ceramics and masonry. Made with state-of-the-art technology, these drill bits guarantee optimal performance and long service life in both DIY and professional environments.

Technical characteristics

- Materials: Tungsten carbide tip CTY and reinforced body.
- Sizes included: 4, 5, 6, 8 and 10 mm.
- Perforation standard: DIN 338.
- Design: Optimized helix for efficient material extraction.
- Compatibility: Standard electric and battery drill holder.

Thanks to its tungsten carbide tip, these drill bits offer superior durability against wear, while the reinforced body minimizes vibrations during operation. This results in cleaner and stable drilling, reducing the risk of breakage or deviations in hard materials such as brick or metal.

Installation is simple; simply make sure the drill has a standard drill holder and select the diameter required before starting drilling. Maintain constant but moderate pressure to maximize propeller geometry and ensure clean removal of the material without obstructions.

Specifications

EAN	8425160495756
Material	Carburo
Weight (kg)	0.137
