Description

The 65mm round Handlock office knob is a security and access control device that combines robust functionality with elegant metal design. Its internal and external closing technology allows to manage the passage in professional spaces, guaranteeing the privacy and administrative order through a mechanism of key of high durability.

Technical characteristics

- Diameter of the knob: 53mm
- Lace rosette: 65mm
- Adjustable lace measurement: 60/70mm
- Compatible door thickness: 30/50mm
- Finished: Nickel matt metallic colour
- Body: Steel or Zamak
- System: Interior free passage, exterior key lock
- Includes set of 3 brass keys and installation kit with screwdriver

This system provides precise control over access to private offices, confidential archives or restricted areas within an organization. The combination of keyless and external internal lock with key facilitates the daily management of staff while maintaining perimeter security.

The installation is simple thanks to the complete kit that includes all screws and the necessary

locksmith. It adapts to standard doors between 30 and 50mm thick, allowing fast and secure assembly in any corporate environment without the need for additional specialized tools.
