## Description

The Pomo Input Handlock is an indoor and outdoor handlebar system designed to ensure privacy and security in residential or commercial spaces. Its adjustable lace technology allows a versatile installation, adapting to different door thicknesses without the need for complex structural modifications.

Technical characteristics

- Metallic matt nickel finish
- Adjustable lace 60/70mm
- Rosette 65mm
- Handle length 100/120mm
- Compatible door thickness between 30/55mm
- Metal body in steel or zamak
- Handle made of aluminium
- Includes set of 3 brass keys
- Tornillery and locksmith included

This system offers a robust solution for access control, combining durability with a modern aesthetic design that integrates perfectly into any architectural environment. The aluminum handle incorporates condemnation for interior privacy and external key closure, ensuring the required functionality.

The installation is easy thanks to the complete kit provided. It is recommended to adjust the mechanism according to the specific thickness of the door before attaching the final screws to ensure optimal operation and a long service life of the product. The set includes 65mm rosette and screwdriver required for quick assembly.
