Description

The IP54 Onlex surface bell push button is a robust acoustic signaling device for industrial and commercial electrical installations, ensuring reliable operation in demanding environments.

Technical characteristics

- Power supply: 250V
- Maximum intensity: 10A
- Degree of protection: IP54
- Type of assembly: Area
- Connection mechanism: Fast Bribing

This push-button offers a clear and powerful sound response, essential for emergency alerts or process control. Its compact design facilitates integration into existing control panels without occupying additional space, optimizing the use of the available area.

For installation, it is recommended to place the device in accessible areas where the sound can be heard effectively by the staff. Connecting the cables by means of the fast-bore system ensures a clean and safe assembly, significantly minimizing work times and reducing errors during execution.

Specifications

Colour	White
EAN	8425160245214
Material	ABS
Weight (kg)	0.108
Protection	IP54
Type of installation	Surface
