Onlex White Flush Mount Glow Push Button 10A 250V

Brand: ALFA

Reference: ALFA 24592

The ONLEX S-EMPOTRAR light push-button is a white-finished serial switch designed for safe electrical installations. Operates with a rated 10A current and supports voltages up to 250V AC, ensuring reliable operation in residential and commercial environments under current technical regulations.

Description

The Onlex recessable light push-button in white finish is an electrical control device designed for visual signaling and circuit activation in industrial and commercial installations. Its integrated technology allows a clean aesthetic when installed inside boards or walls, offering a robust solution for the handling of standard electrical charges with state indication.

Technical characteristics

- Nominal power: 10 Amps
- Maximum voltage supported: 250 Volt CA
- Housing material: White plastic high strength
- Series: Embedded
- Design: Integrated light pulser
- Installation facility: Simplified system for fast installation

This device provides a clear visual indication through its internal light, facilitating the immediate identification of the circuit state and improving operational safety in demanding working environments where instant signaling is crucial to avoid human errors.

The installation is done by connecting the device to the electrical grid according to the manufacturer's specifications, ensuring that the load does not exceed 10A limits to ensure safe and durable operation without overheating risks or electrical faults in the line.

Specifications

Rated current (A)	10
Colour	White
EAN	8425160245924
Material	Plástico
Weight (kg)	0.0858
Nominal voltage (V)	250 Voltios CA
