M-6 Teka Butane Injector Kit

Brand: ALFA

Reference: ALFA 34226

Teka's M-6 injector kit is specifically designed for use with butane gas in industrial kitchen applications. This set includes the necessary components to ensure efficient and controlled combustion in professional furnaces and plates.

Description

The Teka M-6 Butane Injector Kit is a precision system designed to optimize combustion in liquefied gas applications, ensuring energy efficiency and clean operation in industrial and commercial equipment.

Technical characteristics

- Nominal power: 6 kW
- Fuel: Butane (G.L.P.)
- Construction materials: Stainless steel and high strength brass
- Injection technology: Adjustable automatic dosing system
- Standard connections: Metric threads for universal integration
- Operational autonomy: Continuous design without interruptions

This kit improves the stability of the flame and reduces unwanted emissions, ensuring optimal performance in furnaces, dryers and boilers that require accurate control of the gaseous flow under variable conditions.

The installation is simple by direct connections to the supply line, requiring only initial pressure adjustments and watertightness verification according to current regulations to ensure total safety in daily operation.

Specifications

EAN	8425160342265
Material	Steel
Weight (kg)	0.0153
