Description

The ONLEX Titanium Phone Embedded is a specialized telephone recessing device for 230V and 10A electrical installations. Made of titanium, this frame combines structural resistance with modern aesthetics, guaranteeing durability and superior environmental protection.

Technical characteristics

- Nominal power: 10A
- Service voltage: 230V
- Constructive material: Titanium
- Assembly system: Wall Embedded
- Compatibility: To be combined with frames of the same range

This recessable phone offers a robust solution for environments that require high structural integrity and reliable electrical insulation, eliminating risks associated with conventional materials. Its design eliminates the mechanical weaknesses typical of other components, ensuring a safe operation in plumbing or electricity works.

The installation is simple by means of direct coupling with the corresponding ONLEX series frames, which ensures a uniform and professional finish in any type of work. This system allows the device to be easily integrated into the existing infrastructure without additional technical complications.

Specifications

Colour	Titanio
EAN	8425160251062
Material	Titanio
Weight (kg)	0.0684
Nominal voltage (V)	230V
