Description

The horizontal recessable frame of the Onlex series is a technical solution designed for electrical and telecommunications installations that require an aesthetic finish integrated into the wall. Made with precise profiling technology, this system ensures the safe protection and organization of internal elements through its robust structure.

Technical characteristics

- Material: High resistance aluminium
- Finished: Brilliant silver
- Settings: Horizontal recess series
- Composition: 5 modular elements
- Design: Continuous profiling for aesthetic integration

This system offers a competitive advantage by combining mechanical durability with an elegant metallic finish that perfectly adapts to high standard professional and residential environments, providing a clean and orderly solution for infrastructure management.

The installation consists of attaching the main profile to the support surface using the included anchor points, then securing each of the five functional modules in their designated position within the structural framework.

Specifications

Colour	Plata
EAN	8425160251406
Material	Aluminio
# Elements	5 elementos
Weight (kg)	0.2535
