Titanium Flush Mount Illuminated Push Button 10A 250V

Brand: ALFA

Reference: ALFA 25165

The S-EMPOTRAR light push-button from the Titanio Onlex range is a built-in serial device designed for safe electrical installations. Operates with a rated capacity of 10A and 250V, ensuring reliable performance in industrial environments. Its robust housing facilitates a simple and durable installation, meeting the technical standards required for its professional use.

Description

The Titanio Onlex range's recessable light push-button is an electrical control device designed to activate lighting circuits or signals using its touch mechanism. Made of high-strength materials, it ensures reliable operation in industrial and commercial environments where safe and durable drive is required.

Technical characteristics

- Nominal power: 10A
- Maximum voltage: 250V
- Series: Embedded
- Range: Titanium
- Housing material: High quality resistant

This device offers optimal performance by integrating an internal lighting system that provides immediate visual feedback to the user. Its compact design allows an aesthetic integration into control panels, improving usability and operational safety in electrical installations.

The installation is simple and fast, adapting to standard underrun regulations. It only requires connecting the cables corresponding to the terminals of entry and exit, ensuring a correct assembly

before attaching the device to its prepared housing.

Specifications

Colour	Titanio
EAN	8425160251659
Material	ABS
Weight (kg)	0.0864
Nominal voltage (V)	250V
