Description

The Handlock Combination Padlock is a portable security device designed to protect assets using customizable numeric code. Its three-reel technology allows you to configure a unique combination, eliminating the need for physical keys and facilitating controlled access.

Technical characteristics

- Arc material: High-strength tempered steel
- Mechanism: Three numerical aperture rollers
- Configuration capacity: 10 digits per roller
- Dimensions: 30 mm wide
- Colour: Blue
- Key requirement: No key required

This lock offers a robust and discreet solution to secure private spaces. Its compact design ensures that the code is visible only to those who know it, providing an additional layer of protection against unauthorized access in luggage or furniture.

The installation is immediate when attaching the device to the desired surface. The user configures its own code at first use, adjusting the rollers until listening to the confirmation click. Subsequently, the correct combination is introduced to unlock the mechanism and access the protected content without external tools.

Specifications
