Description

The Vatton Precision Screwdriver is a professional set of four tools designed for fine-tuning and repair work, manufactured with state-of-the-art technology in high-strength alloys to ensure durability and precision in each use.

Technical characteristics

- Body made of chrome-vanadium steel
- Tips PL2,5x50mm and PL3x50mm
- Tips PH00x50mm and PHx50mm
- Magnetized tip design for screw retention
- Bimaterial handle with non-slip finish

These tools offer a significant advantage by allowing small components to be handled without risk of falling, facilitating installation in reduced spaces where gripping is critical to the success of the operation. The magnetation ensures that small screws remain attached to the tip while looking for the right groove.

The installation is carried out by inserting the tips directly into the grooves of the screws or grooves of the panels, applying controlled pressure to avoid damage to the surface of the material during tightening or fastening. The bimaterial handle provides a safe and comfortable grip, reducing fatigue in extended working sessions.

Specifications

Diameter	2.5 mm
EAN	8425160523343
Manufacturer	ALFA
Long	5
Material	Steel
Weight (kg)	0.0069
