Butane Injector Kit M-7 Teka

Brand: ALFA

Reference: ALFA 34932

Teka's M-7 injector kit is designed for butane gas systems. Includes specific components for flow regulation in industrial and domestic applications. Made of materials resistant to high temperatures, it guarantees durability and operational efficiency in safe combustion plants.

Description

The Teka M-7 Butane Injector Kit is a specialized set designed for the precise regulation of gas flow in domestic and industrial applications that use butane. Its technology optimizes combustion, ensuring energy efficiency and operational safety in heating or cooking systems.

Technical characteristics

- Compatible exclusively with butane gas.
- Specific model M-7 of the Teka brand.
- Robust construction for continuous and stable injection.
- Designed to adapt to standard butane bottle regulators.

This kit improves the performance of burners by adjusting the air-gas mixture, reducing unwanted emissions and maximizing heat transfer. Its silent operation allows its use in residential environments without discomfort.

The installation is simple: connect the kit to the bottle regulator and secure the connections with the right keys. Verify leaks with soap before turning on the system. Keep clean to avoid future obstructions.

Specifications

EAN	8425160349325

Material	Steel
Weight (kg)	0.0151
