4-Pole Quick Connector 0.5-2.5MM

Brand: ALFA

Reference: RST 26633

This quick connector allows joining cables with a cross-section between 0.5 mm² and 2.5 mm² via a direct insertion mechanism without tools. It features four independent terminals to ensure a safe and efficient electrical connection in industrial or domestic installations, facilitating circuit maintenance and expansion with maximum mechanical stability.

Description

The 4-Pole Quick Connector is a versatile solution designed to establish safe and efficient electrical unions in low-voltage installations. Its technology enables direct cable connection without the need for complex tools, ensuring an agile and reliable assembly in various industrial and residential environments.

Technical Features

- Compatibility with cables from 0.5 mm² to 2.5 mm²
- 4 independent terminals for multiple simultaneous connections
- Optimized design for fast and secure insertion
- Wear-resistant mechanical material

This device offers great flexibility in power distribution, facilitating the integration of electronic components or lighting systems. Its ability to handle different cable thicknesses makes it adaptable to projects requiring frequent adjustments or scalability.

Installation is simple: just align the cables and press the mechanism until you hear the locking click. No soldering or additional insulation is required, which significantly reduces construction times and minimizes human errors during execution.

Specifications

Colour	Grey
EAN	8425160266332
Material	ABS
Weight (kg)	0.0061
Reference	ALFA 26633
