Description

The 3T White Onlex Polypropylene base with cableless switch is a compact electrical solution designed to power multiple devices simultaneously through three independent power sockets. Made with resistant polypropylene technology, it guarantees safety and durability in domestic or professional environments.

Technical characteristics

- Maximum power per shot: 16A
- Nominal voltage: 250V
- Body material: White polypropylene
- Includes integrated light switch
- Ground connection in all sockets
- Incorporated child protection
- Installation without wiring required

Its ability to safely distribute energy makes it perfect for charging computers, appliances or tools at offices, workshops and events. Protection against unauthorized access ensures the continuous operation of sensitive equipment.

The installation is simple: just attach the base to a flat surface and connect the rear power cables before closing the panel. Its lightweight design facilitates its transport between different spaces without

compromising the electrical stability.

Specifications

Rated current (A)	16
Colour	White
EAN	8425160267483
Material	Polypropylene
Weight (kg)	1.071
Power (W)	16
Nominal voltage (V)	250V
