Description

The Onlex White 4T Polypropylene base with a cableless switch is a compact electrical solution designed to distribute energy safely and efficiently in spaces where the fixed wiring installation is complex. Made with resistant polypropylene technology, it allows to power multiple devices simultaneously through an integrated plug system.

Technical characteristics

- Material: White polypropylene
- Number of shots: 4
- Nominal voltage: 250V
- Amperage: 16A
- Ground connection: Yes
- Switch: Integrated light
- Child protection: Integrated

This device offers a safe electrical distribution thanks to its earth-connected sockets, ensuring the stable operation of appliances and electronic equipment in homes, offices or workshops. Its robust design and protection against unauthorized access make it a reliable option for high-transit environments.

The installation is simple and quick, requiring only the power cables to be connected to the

corresponding terminals without the need for major works. Once mounted, the light switch allows to control the energy visually, facilitating its use at any time of day.

Specifications

Rated current (A)	16
Colour	White
EAN	8425160269197
Intensity	16A
Material	Polypropylene
Weight (kg)	1.25
Power (W)	3680
Nominal voltage (V)	250V
