Driver Downlight LED Matei 15W

Brand: ALFA

Reference: ALFA 22744

This 15W driver is specifically designed to power LED downlights, ensuring stable and efficient operation. Its integrated technology ensures a precise regulation of the luminous flux, optimizing the energy consumption in interior lighting installations. It has protection against overloads and short circuits to extend the life of the connected lighting system.

Description

The DRIVER DOWNLIGHT LED MATEL 15W is an essential electronic component designed to power and regulate the current of LED luminaires, ensuring stable and efficient operation. Its integrated technology protects modules against voltage fluctuations, ensuring long service life and optimal performance in residential or commercial facilities.

Technical characteristics

- Nominal power: 15W
- Technology: LED Driver
- Implementation: Downlight
- Mark: Matei

This device is essential to maintain light consistency and avoid blinking in connected lamps. Its compact design facilitates its integration within downlights, optimizing the available space and improving the final aesthetics of the installation.

The installation requires connecting the power cables to the driver's input terminal and then to the corresponding LED modules, always following current electrical regulations to ensure operational safety. This system has protection against overloads and short circuits to extend the life of the connected lighting system.

Specifications

EAN	8425160227449
Weight (kg)	0.042
Power (W)	15
