White horizontal recessed frame for 4 elements ONLEX

Brand: ALFA

Reference: ALFA 27282

The ONLEX S-EMPOTRAR recessable frame features an ABS finish and horizontal configuration for four elements. Its technical design facilitates installation by means of direct insertion system in standard partitioning. The structure guarantees mechanical stability and precise alignment of the assembled components, complying with secure locking regulations in interior spaces.

Description

The horizontal white frame for embedding four ONLEX elements is a standard solution specifically designed for electrical and telecommunications installations that require robust organisation and protection. Made of ABS material technology, this system guarantees durability in demanding environments while facilitating the orderly management of internal components.

Technical characteristics

- Finished in high resistance ABS.
- Composition of four modular elements.
- Optimized horizontal design for recessing.
- Easy installation without complex tools.

This framework offers significant benefits by allowing orderly management of cables and devices, improving the final aesthetics of the installation and ensuring fast and secure access to internal components in the event of future maintenance or expansion. The structure ensures mechanical stability and precise alignment of the assembled components.

The installation is simple: the system is placed in the intended opening and fixed by means of the included clamping mechanisms, achieving a perfect integration with the wall. This process ensures mechanical stability during prolonged use and complies with secure locking regulations in standard

indoor spaces.

Specifications

Colour	White
EAN	8425160272821
Material	ABS
# Elements	4 elementos
Weight (kg)	0.0764
