Description

The Onlex Polypropylene White 6T plug base is a modular electrical device designed to distribute energy safely and efficiently in spaces requiring multiple simultaneous connections. Its polypropylene technology guarantees durability and impact resistance, while the absence of cable facilitates its rapid installation without the need for complex civil works.

Technical characteristics

- Number of shots: 6 units
- Material: White polypropylene
- Nominal voltage: 250V
- Amperage: 16A
- Includes integrated light switch
- Tomas with ground connection
- Integrated child protection

This electrical accessory allows to power simultaneously several electronic devices, tools or appliances without saturating the main network. Its robust design and neutral color perfectly adapts to residential environments, offices, workshops or temporary events where mobility and safety are priority.

The installation is simple: it is placed directly on the wall or table surface, ensuring that the switch is accessible for manual operation. It does not require prior wiring or specialized tools, allowing immediate start-up when connecting devices to available sockets.

Specifications

Rated current (A)	16
Colour	White
EAN	8425160276737
Intensity	16A
Material	Polypropylene
Weight (kg)	1.6
Power (W)	3680
Nominal voltage (V)	250V
